Such commission shall conduct researches into its local land areas and shall seek to co-ordinate the activities of unofficial bodies organized for similar purposes, and may advertise, prepare, print and distribute books, maps, charts, plans and pamphlets which in its judgment it deems necessary for its work. It shall keep an index of all open areas within the city or town, as the case may be, with the plan of obtaining information pertinent to proper utilization of such open areas, including lands owned by the commonwealth or lands owned by a city or town. It shall keep an index of all open marshlands, swamps and all other wet lands in a like manner, and may recommend to the city council or selectmen and, subject to the approval of the city council or selectmen, to the department of natural resources and to the state reclamation board a program for the better promotion, development or utilization of all such areas. It shall keep accurate records of its meetings and actions and shall file an annual report which shall be printed in the case of towns in the annual town report. The commission may appoint such clerks and other employees as it may from time to time require. The commission shall consist of not less than three nor more than seven members. In cities the members shall be appointed by the mayor, subject to the provisions of the city charter, except that in cities having or operating under a Plan D or Plan E form of city charter, said appointments shall be by the city manager, subject to the provisions of the charter; and in towns they shall be appointed by the selectmen, excepting towns having a manager form of government, in which towns appointments shall be made by the town manager, subject to the approval of the selectmen. When a commission is first established, the terms of the members shall be for one, two or three years, and so arranged that the terms of approximately one third of the members will expire each year, and their successors shall be appointed for terms of three years each. Any member of a commission so appointed may, after a public hearing, if requested, be removed for cause by the appointing authority. A vacancy occurring otherwise than by expiration of a term shall in a city be filled for the unexpired term in the same manner as an original appointment, and in a town in the manner provided in section eleven of chapter forty-one. Said commission may receive gifts of funds, lands, buildings and other properties in the name of the city or town, subject to the approval of the city council in a city, or the selectmen in towns. Such gifts shall be held in the name of the city or town, but may be managed by the commission for the purposes set forth in this section.

The first thing I noticed when I stepped out of the car was the cold air. It was a sharp contrast to the warm interior. I looked around, trying to get my bearings. The street was quiet, with only a few cars parked along the curb. The buildings were old, with a mix of brick and stone. I felt a sense of curiosity and a little bit of apprehension. This was my first time in a new city, and I was alone.

I walked down the street, my hands in my pockets. The air was crisp, and the sun was just starting to rise. I felt a sense of peace and a little bit of hope. This was my chance to start over, to begin a new life.

THE FOURTH DAY

The fourth day was a day of reflection. I had found a place to stay, and I was starting to get my bearings. I walked through the streets, taking in the sights and sounds. The people were friendly, and the food was delicious. I felt like I had found a new home. I was going to make this my home.

The first part of the paper is devoted to a general discussion of the problem of the origin of life. It is shown that the problem is one of the most important and interesting in the history of science. The author discusses the various theories of the origin of life, and shows that the most probable one is that of spontaneous generation. He then discusses the evidence in favor of this theory, and shows that it is supported by the facts of the case.

The second part of the paper is devoted to a detailed discussion of the evidence in favor of spontaneous generation. The author discusses the various experiments that have been conducted on this subject, and shows that they all support the theory of spontaneous generation. He then discusses the various objections to this theory, and shows that they are all unfounded. He concludes that the evidence in favor of spontaneous generation is overwhelming, and that it is the only theory that is supported by the facts of the case.

The third part of the paper is devoted to a discussion of the implications of the theory of spontaneous generation. The author shows that this theory has important implications for our understanding of the history of life on earth. It shows that life is not a rare phenomenon, but that it is a common one. It also shows that life is not a product of divine intervention, but that it is a product of natural processes. The author concludes that the theory of spontaneous generation is not only a scientific theory, but that it is also a philosophical one.

1. The first part of the paper is devoted to a general discussion of the problem. It is shown that the problem is of great importance in the theory of differential equations. The second part is devoted to the construction of the solution. It is shown that the solution can be obtained by the method of variation of parameters. The third part is devoted to the study of the properties of the solution. It is shown that the solution is unique and that it satisfies the boundary conditions. The fourth part is devoted to the study of the stability of the solution. It is shown that the solution is stable with respect to the initial conditions. The fifth part is devoted to the study of the asymptotic behavior of the solution. It is shown that the solution tends to zero as the independent variable tends to infinity.

CHELMSFORD, MASSACHUSETTS

June 4, 1962

Mrs. Charlotte P. DeWolf
Town Treasurer
Town Hall
Chelmsford, Massachusetts

Dear Mrs. DeWolf:

To confirm the ruling which I have already given you, the action taken by the Annual Town Meeting held on March 12, 1962 under Article 16 relative to the purchase of an Aerial Ladder Truck for the Fire Department was invalid in its entirety because it was not passed by the required two-thirds vote according to the records of said Meeting.

I would, therefore, advise you that since no money was transferred or raised and appropriated thereunder, there should be no account kept by the Town ^{for} of this purpose.

Very truly yours,

Vernon R. Fletcher
Chelmsford Town Counsel

Concentration of the solution (M)	Rate of reaction (M/min)
0.1	0.01
0.2	0.02
0.3	0.03

The first of these is the fact that the population of the United States has increased from 22,992,426 in 1870 to 76,212,317 in 1900. This increase has been the result of a number of causes, the most important of which are the immigration of foreign-born persons and the natural increase of the native-born population. The immigration of foreign-born persons has been the result of a number of causes, the most important of which are the desire for better living conditions, the desire for better educational opportunities, and the desire for better economic opportunities. The natural increase of the native-born population has been the result of a number of causes, the most important of which are the high birth rate and the low death rate.

It further provides that any property the income of which is taxed under the provisions of the proposed Article may be exempted from the imposition and levying of proportional and reasonable assessments, rates and taxes as at present authorized by the Constitution, and that the Article shall not be construed to limit the power of the General Court to impose and levy reasonable duties and excises.

Removal Soil,
Loam, Sand,
et. (con't.)

- a. A variance must first be obtained from the Board of Appeals following written application and submission of a plan showing existing grades in the area from which the material is to be removed, together with proposed finished grades at the conclusion of the operation. The Board of Appeals is empowered to issue said variance upon proper application of provisions b., c., d., and e. below. The variance shall be subject to and include a time limit as set by the Board of Appeals; and furthermore prior to issuance of the variance, the applicant shall be required to post with the Town a performance bond having a value set at the discretion of the Board of Appeals and sufficient in their judgment to insure conformance by the applicant with the applicable provisions of this by-law. The Board of Appeals shall hold a public meeting or hearing on the matter, of which public notice shall be given.
- b. No soil, loam, sand, or gravel shall be removed from any land lower than one foot above the grade level of any adjacent street or way, except when such removal is incidental to highway improvement or construction at the site of removal.
- c. No soil, loam, sand, or gravel shall be removed in any one year to a depth greater than 20% at the place of removal, except for local agricultural or horticultural use, or incidental to the construction of dwellings or other structures. Material removed for construction or highway improvement purposes must be disposed of within the town. This by-law will not apply to any greenhouse owners in Town.
- d. The natural topography surrounding the pit or site of removal shall not be disturbed within 100 feet of any abutting land, road, or way.
- e. No bank shall exceed a slope of one foot of vertical rise in three of horizontal distance except in the case of ledge rock.
- f. Upon completion of removal and prior to release of the performance bond, a minimum of five (5) inches of top soil shall be applied to the area affected. Trees at least five (5) feet in height and of the hardwood variety shall be planted at a density of 1 tree to every 400 square feet of land, except ledge rock, within the affected area. Shrubs of a suitable variety, as designated by the Tree Warden, shall be planted on all slopes at a density adequate to prevent soil erosion.
- g. All necessary measures shall be taken to assure proper drainage during and after the removal operation. The Board of Appeals and the Building Inspector shall be empowered to impose additional specific measures if in their judgment such measures are necessary to assure proper drainage; however failure to impose such specific measures does not relieve the holders of the variance from complying with this provision.
- h. Variances for the removal of soil, loam, sand, or gravel, may be amended from time to time at the discretion of the Board of Appeals during the operation, consistent with the provisions of this by-law.
- i. At least two inspections of the removal site shall be made by designated representatives of the Board of Appeals and the Building Inspector. When the Building Inspector ascertains that the provisions of this by-law have been carried out, or are in the process of being carried out to his satisfaction, he shall so certify in writing to the Board of Appeals. No sooner than eight (8) months after the date of receipt by the Board of Appeals of the aforesaid certification, another inspection of the removal site shall be made as before. If the Building Inspector finds that all provisions not previously carried out have not been satisfied to completion, he shall so certify in writing to the Board of Appeals, who shall then be permitted to release the performance bond. This latter inspection may be waived and the performance bond released if the original inspection discloses that all other provisions of this by-law have been carried out to completion. In such case, the Building Inspector shall certify in writing to the Board of Appeals precedent to release of the performance bond.

10.2.1 The application shall be accompanied by a plan showing existing grades in the area from which the above material is to be removed, and in surrounding areas, together with the proposed finished grades at the conclusion of the operation, and the proposed cover vegetation and trees.

10.2.2 A performance bond in an amount determined by the Board of Appeals has been posted in the name of the Town assuring satisfactory performance in the fulfillment of the requirements of this By-Law and such other conditions as the Board of Appeals may impose as conditions to the issuance of its permit in the interests of safe-guarding the district and the Town against injury, the future use of the land after operations are completed, or to control the transportation of such material through the Town. Upon failure to comply and forfeiture of the bond, monies therefrom shall be utilized by the Town for the purpose of fulfilling these requirements.

Removal--Removal operations shall be subject to the following conditions:

1.3.1 Removal shall not take place at any grade less than one foot above the grade level of any adjacent street or way, or below a level that would reasonably be considered a desirable grade for the later development of the area, or below the grades specified on the plan accompanying the permit application.

1.3.4 Soil shall not be disturbed within 100 feet of the boundaries of the premises, excepting at the conclusion of operations if required in order to improve the overall grading.

Restoration--Forthwith following the expiration or withdrawal of a permit, or upon voluntary cessation of operations, on completion of removal in a substantial area, that entire area shall be restored as follows:

1.4.1 All land shall be so graded that no slope exceeds two foot vertical rise in 3 feet horizontal distance, and shall be so graded as to safely provide for drainage without erosion.

1.4.4 Bond shall not be released until sufficient time has elapsed to ascertain that the vegetation planted has successfully been established and that drainage is satisfactory.

1.5 Additional Conditions--The Board of Appeals may set conditions in addition to the above before issuance of a permit, including but not limited to: duration of the permit, hours of the day during which removal may be permitted, hours during which vehicles may be permitted to leave the premises, trees to be planted, and the use of covers on loaded vehicles.

1.6 Renewal or Revocation of Permit--A permit may be renewed only upon application and following a public hearing. For renewal, inspection of the premises shall be made by the building inspector to determine that the provisions of this By-Law are being complied with. The Board of Appeals, after hearing and proof of violation of the conditions of the permit (10.2.3) of the permit, or of this By-Law, shall withdraw the permit, after which the operation shall be discontinued and the area restored in accordance with Section 10.4.

SECTION XI - ADMINISTRATION

11.1 Board of Appeals--There is hereby established a Board of Appeals of five members and two associates to be appointed by the Board of Selectmen, as provided in Chapter 40A of the General Laws, which shall act on all matters within its jurisdiction under this By-Law in the manner prescribed in Chapter 40A of the General Laws. The Board of Appeals shall have the following powers:

11.1 Appeals--To hear and decide any appeal taken by any person aggrieved by reason of his inability to obtain a permit from any administrative official under the provisions of Chapter 40A, General Laws, or by any officer or board of the Town, or by any person aggrieved by any order or decision of the inspector of buildings or other administrative official in violation of any provision of Chapter 40A, General Laws, or by this By-Law. Appeals shall be based upon the belief that the applicant has been aggrieved by an administrative action with reference to interpretation of this By-Law, and action by the Board of Appeals shall be based upon reasons essentially in compliance with the fulfillment of the intent and purpose of this By-Law and in accordance with its objectives.

11.2 Special Permits--To grant a special permit for an exception as provided by sections of this By-Law when the Board shall have found that the use involved will not be detrimental to the established or future character of the neighborhood and/or district and town, and subject to appropriate conditions or safe-guards as deemed necessary.

11.3 Variances--To authorize upon appeal, or upon petition in cases where a particular use is sought for which no permit is required, with respect to a particular parcel of land or an existing building thereon a variance from the terms of this By-Law where, owing to conditions but not affecting the parcel or such building but not affecting generally the neighborhood or district in which it is located, literal enforcement of the provision of this By-Law would involve substantial

hardship, financial or otherwise to the appellant, and where desirable relief may be granted without substantial detriment to the public good and without nullifying or substantially derogating from the intent or purpose of this By-Law, but not otherwise. Variances shall not be granted as a result of desires and personal hardship but upon extenuating physical conditions existing on the land.

11.1.4 Public Hearings--The Board of Appeals shall hold public hearings in accordance with the provisions of Chapter 40A on all appeals and petitions brought before it. Notice of such public hearings shall be sent to all abutters by registered mail.

11.2 Enforcement--This By-Law shall be enforced by the Building Inspector, who shall be appointed by the Board of Selectmen. He shall grant no permit for the construction, alteration, relocation, occupancy or use of any building, structure or premises in violation of any provision of this By-Law. Whenever any permit or license is refused because of some provision of this By-Law, the reason therefore shall be clearly stated in writing. The Building Inspector may, with approval of the Board of Selectmen, institute appropriate legal proceedings to enforce the provisions of this By-Law or to restrain by injunction any violation thereof; or both, and shall do all further acts, revoke the permit for occupancy, institute and take any and all such action as may be necessary to enforce full compliance with any and all of the provisions of this By-Law. Applications for building permits shall be accompanied by two prints of a plan of the lot, drawn to scale, showing the actual dimensions of the lot, and the exact location and size of any existing or proposed buildings, and showing streets and ways adjacent to the lot. No building hereafter erected, altered, or relocated shall be used and no change shall be made of the use of any building or any parcel of land, unless an occupancy permit signed by the Building Inspector has been granted to the owner or occupant of such land or building. Such permit shall not be granted unless the proposed use of the land or building and all accessory uses comply in all respects with this By-Law and no use shall be made of such land or buildings except the use or uses authorized by such occupancy permits.

11.3 Penalty--Any person violating any of the provisions of this By-Law may be fined not more than \$50.00 for the first offense, \$100.00 for the second offense, and \$200.00 for the third and subsequent offenses. Each day that such violation continues shall constitute a separate offense.

11.4 Amendments--This By-Law may from time to time be changed by amendment, addition or repeal by the Town Meeting in the manner provided in Section six (6) of Chapter Forty A (40A) of the General Laws, and any amendments therein.

11.5 Validity--The invalidity of any section or provision of this By-Law shall not invalidate any other section or provision thereof. When this By-Law imposes a greater restriction of the use of buildings, structures, or premises, or on height of buildings, or requires larger yards, or open spaces than are imposed or required by any regulations or permits, or by any restrictions, easements, covenants or agreements, the provisions of this By-Law shall control.

11.6 Repetitive Petition--The acceptance of this By-Law includes the acceptance of Chapter Forty A (40A) Sections Eight and Twenty (8) and (20), of the General Laws of the Commonwealth of Massachusetts and any amendments thereof.

11.7 Effective Date--This By-Law shall take effect upon adoption by the Town, subject to the approval of the Attorney General of the Commonwealth of Massachusetts, and publication, as provided by law.

penalty effective date this By-Law shall amend, and be substituted for, the existing Zoning By-Laws of the Town of Chelmsford, but shall not affect such rights or duties that have matured, penalties that were incurred, proceedings that were begun or appointments made before its effective date, pursuant to the previously existing zoning by-laws.
